Parts and build progress

Pilot · communal-build working records

Track purchasing, delivery and fitting separately so the team can see which work is ready and which jobs are waiting on supplies.

Selected tracker entries

Item	Ordered	Received	Fitted / completed
Fork seals	Yes	Yes	Yes
Upper brake-line fitting	Yes	Yes	No
Rear brake shoes	Yes	No	Waiting on parts
Front tyre	Yes	No	Waiting on parts
Front caliper rebuild kit	No	No	Waiting on parts

Purchasing and workshop status

The working tracker holds supplier, specification and cost alongside ordered, received and fitted status. The entries above are a saved progress snapshot.

Parts sourcing

The donation pitch requests components or discounts for the two community motorcycles. Track what is agreed and received before treating it as available to the build.

Next-build preparation

Select base motorcycles in better initial condition and appoint a professional supervisor. Build a defined schedule around the mechanical work and learning activities.
